

Chameleon KC19802C

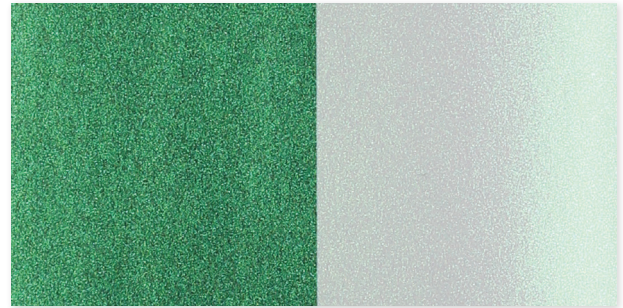

SPECIAL FLASH GOLD GREEN

Product Information

INTERPLAY OF LIGHT AND NATURE

Chameleon KC19802C is like a stroll in the park - refreshing and inspiring

Breathtaking, ultra-intense **color travel** effect in interference **green to yellow**, combined with a **highly reflective sparkle**.

KC19802C displays the lively interaction of wind and sun with a canopy of intensely green leaves. **Bright yellow** dappled with **shimmering green interference spots**, that appear as the **viewing angle changes**, will make your final application stand out.

This pigment is based on **calcium aluminum borosilicate**, coated with TiO_2 and SnO_2 to give your surfaces a **pure, bright look** without significantly altering the surface color.

CHAMELEON KC19802C

Optical Features	Special Product Features
Intense, radiant fresh green to light yellow	Glittering green-yellow interference color flop on borosilicate
Exceptional sparkle	Allows the base color of the application substrate to shine through
Outstanding interference green to yellow color travel	Eye-catching, ultra intense color travel effect finish
Ultra-transparent	Suitable for all common effect pigments applications
Very low influence on the background color	Multilayer technology

ORDERING INFORMATION

Product	Color	Package size
KC19802C Special Flash Gold Green	Gold green multicolor	samples, 1 kg, 5 kg, 25 kg

PRODUCT INFORMATION

Property	Chemical Name	CAS no. / Value
Composition	Calcium Aluminum Borosilicate	65997-17-3
	Titanium Dioxide (TiO_2)	13463-67-7
	Tin Oxide (SnO_2)	18282-10-5
Particle size distribution		30-120 μm
pH Value		7.0 -11.0
